Professional Summary

Skilled Web Developer specializing in Java, JavaScript, and front-end technologies with hands-on experience building AI-powered web applications. Demonstrated expertise in developing innovative solutions including dual-engine AI resume builder with cryptographic caching and contributing to open-source projects (6 merged pull requests). Proficient in Core Java, JavaScript, HTML5, CSS3, SQL, MySQL, Git/GitHub, API integration (Groq, Gemini), and AWS.

Technical Skills

Programming Languages: Core Java (OOP), JavaScript (ES6+), Python, C, SQL
Web Development: HTML5, CSS3, JavaScript, React.js (Learning)
AI Integration & APIs: Groq API, Gemini API, RESTful API Integration
Database & Backend: MySQL, Database Design, Supabase
Tools & Platforms: Git, GitHub, IntelliJ IDEA, Antigravity, AWS (EC2, S3, Lambda), Vercel, Render
Basic Knowledge: Docker, Containerization

Projects

- AI LaTeX Resume Builder** (Live) *Node.js, Express.js, Supabase, Groq API, Docker* Feb 2026
- Architected a full stack AI resume platform using dual-engine AI orchestration (Groq API + Gemini API) to automate LaTeX resume generation, cutting creation time by 95% — from hours to under 2 minutes.
 - Engineered a cryptographic caching layer reducing PDF compilation latency by 80%; built 4 ATS-optimized resume templates and a React.js frontend with real-time LaTeX preview deployed on Vercel.
 - Integrated Node.js/Express.js RESTful API backend with Supabase for user authentication and data persistence, achieving 99%+ uptime and end-to-end full stack production deployment.
- AgriMitra — Farmer-to-Consumer Marketplace** (Live) *React.js, Node.js, Express.js, REST API* Mar 2026
- Designed and shipped a full stack agricultural e-commerce marketplace within a 24-hour hackathon, enabling direct farmer-to-consumer transactions and eliminating supply chain middlemen.
 - Integrated 3 external REST APIs (crop pricing, weather forecasting, Groq AI advisory) with multilingual support for 2 regional languages, expanding platform accessibility for diverse demographics.
 - Built 10+ RESTful API endpoints with Node.js and Express.js; deployed a production-ready application on Vercel with Supabase as the managed database backend.

Open Source Contributions

- Hacktoberfest 2025 — Super Contributor** (View Holopin Badges) Oct 2025 – Nov 2025
- Achieved Hacktoberfest 2025 Super Contributor status by merging 6+ pull requests across open-source repositories including commitra/vanilla-verse, earning the exclusive Holopin Super Contributor badge.
 - Delivered UI/UX enhancements (theme switching, link-based sharing) and bug fixes across 3+ repositories via fork-and-pull-request Git workflows and peer code review.

Education

- Rani Channamma University** Belagavi, Karnataka, India
Bachelor of Computer Applications (BCA) — Computer Science 2023 – 2026
- CGPA: 8.7 / 10.0
 - Hackathon participant who built and shipped full stack production applications under time-constrained, collaborative engineering environments.

Certifications

- Java Skill UP** *GeeksforGeeks* Jan 2026
- 5-Day AI Agents Intensive Course** *Kaggle & Google* Dec 2025
- Getting Started with AWS** *Simplilearn* Jul 2025
